

## SERVICE BULLETIN

IBIS TYPE ENGIN MOUNT FOR ROTAX ENGINES.

September 29, 2008

SB-Ibis-005

**INFORMATIVE**

**AIRCRAFT AFFECTED:**

All the aircraft type IBIS (Magic, Urraco, Millennium), using IBIS type engine mount for Rotax engines.

**REASON:**

Due to standardization design processes IBIS has modified the Ibis type engine mount for Rotax 912 engines. In order to improve performance in the interior space of the Cowling, for better handling and ergonomics when you mount the engine. This new engine mount applies to the Rotax 912 and 914 engines.

The aircrafts operating with the former type of engine mounts do not present any operation problem. This new engine mount applies from this date. *"The pre-engine mount is in addition to the engine mount".*

**SUBJECT:**

Modification of the Ibis type engine mount.

**COMPLIANCE:**

As of this date.

**EXECUTION / INSTRUCTIONS:**

**EXECUTION.** By the production plant.

**INSTRUCTION.** Modification of the engine mount IBIS type for aircraft after the publication date.
